## **Development: An Islamic Vision**

*Kamal T. Hattab\**

### **ABSTRACT**

This study aims to reveal the development concept from all dimensions, and to elucidate the relation between this concept and achieving progress and stability for the entire Muslim World.

The study assumed that the development concept which belongs to the culture of the nation and its heritage will lead the nation to progress and welfare in all aspects of life.

To achieve the goals of this study, the development concept has been tested through the classical and neoclassical schools of economy. The theories of economical development have been studied through the values and cultural standards of the Muslim World.

The paper concludes that the development concept can not be separated from the Islamic values and culture of the Muslim societies, thus it is useless for the Muslims to import non-Islamic development theories.

**KEYWORDS:** Development, Islamic View, Development Theories, Islamic Models.
